

Enrichment & Extra Curricular Activities

Learning new skills, enhancing your subject knowledge and giving back to our community - these are the key reasons why we ensure you follow an enrichment programme at Dene Magna Sixth Form.

Every Wednesday afternoon, students are timetabled to experience enrichment activities which they choose for themselves. We run a number of key courses such as PE, the Duke of Edinburgh award scheme and taught courses such as Japanese. In addition to this, the students are encouraged to run their own enrichment courses - so you could join Astronomy Club, the Debating Society, Film Society, Chess Club, Art Club, Robotics and many others.

Dene Magna students are also expected to get involved in volunteering in the local community - for the majority this has involved returning to feeder primary and secondary schools to offer subject support. Our best Mathematicians have supported in KS4 Maths groups, our Language students have helped out in French and Spanish lessons, many students have supported in our local primary schools with PE, literacy and numeracy teaching and prospective Medical students have visited specialist schools and care homes to gain valuable experience.

Students also have the opportunity to study for their EPQ (Extended Project Qualification). This is an independent academic project which enhances students' research and analytic skills. Valued by employers and universities, we think it's a vital part of preparing students for life after A Levels.
