### **16-19 Recovery Funding**

**Funding for academic year Sept 2020 - August 2021 = £2905**

The government has provided additional funding to schools and colleges in response to the coronavirus pandemic and its disruption to the learning of students at 16-19.

Our spending of this funding will be to ensure students are able to access small, targeted support from staff in order to maintain progress.

This will pay for weekly extra tuition sessions after school and also for transportation between sites where necessary. Sessions will be either one to one or will be limited to fewer than four students per session.

Transportation between sites in addition to that which is normally offered. This will enable students to work with staff in person (when permitted by national lock down restrictions) outside of the school teaching day (after 3.05pm).
